Paragraphs of Text

This is the first paragraph. This paragraph can be a few lines, ideally not more than six lines in a paragraph. A long paragraph for presentation tends to be boring for your audience. Therefore, try not to use paragraph, but instead use bullet points.

You don't have to worry whether a paragraph will fit into a slide. LaTeX handles this automatically. So, you can just focus on your content. Hence from now onwards, try to focus on the content, not on the outlook, which is not a job for Engineers or a technical person.

Lastly, remember that your goal is to be engineer, not graphic designer or graphic artist.

Example 4: Trends in the Internet

- The IP is ubiquitous
- Services with high QoS requirements gain momentum
- Value lies in services
- ⇒ Currently deployed networks need to adapt to these tendencies
- \Rightarrow The IP multimedia Subsystem is seen as a promising solution for fulfilling these needs.

Example 4: Trends in the Internet

- The IP is ubiquitous
- Services with high QoS requirements gain momentum
- Value lies in services
- Currently deployed networks need to adapt to these tendencies.
- ⇒ The IP multimedia Subsystem is seen as a promising solution for fulfilling these needs.

Example 5: The IMS standards

3GPP

initiated at the work on IMS (Release 5 - March 2003), focused on facilitated service development and deployment. 3GPP R7 underway.

ETSI TISPAN

Extended IMS focus for network convergence purposes (Access agnostic) in the scope of the work on Next Generation Networks (NGN). First release available. Second release underway.

IETF

In order to facilitate interoperability IMS specifies the use of open Internet protocols standardized at IETF.

Example 5: The IMS standards

3GPP

initiated at the work on IMS (Release 5 - March 2003), focused on facilitated service development and deployment. 3GPP R7 underway.

- Table and Figure
- 4 Theorem and Verbatim
- Citation and References

Theorem (Mass-energy equivalence)

 $E = mc^2$

23 / 29

Theorem

A = B.

- Clearly, A = C.
- As shown earlier, C = B.
- Thus A = B.

Theorem

A = B.

- \bullet Clearly, A=C.
- As shown earlier, C = B.
- Thus A = B.

Theorem

A = B.

- $\bullet \ \ {\sf Clearly}, \ A=C.$
- As shown earlier, C = B.
- Thus A = B.

Theorem

A = B.

- ullet Clearly, A=C.
- As shown earlier, C = B.
- Thus A = B.

Verbatim

Example (Theorem Slide Code)

```
\begin{frame}
\frametitle{Theorem}
\begin{theorem}[Mass--energy equivalence]
$E = mc^2$
\end{theorem}
\end{frame}
```
